In mold manufacturing
and repair,

choosing
Precision is
the smart
choice

Precision Group®, along with its companies **Prodmash**® and **PMI**® offer you the support of an international company recognized for its processes, experience and commitment to quality.

We guarantee that no matter the challenge, when it comes to design, mold fabrication, modification, engineering changes, mold repair and plastic injection molding, we will always be the right decision.

Culture based on excellence

Precision Group has more than 5 decades experience offering solutions in designing, fabricating and repairing molds for various industries.

We understand the challenges that our customers face.

We live a **Culture of Precision** that is based on 3 promises

01

Every detail speaks of us.

We are systematic in every step of our quality process.

02

Our commitment never ends.

We make monitoring part of our service and innovation part of our growth.

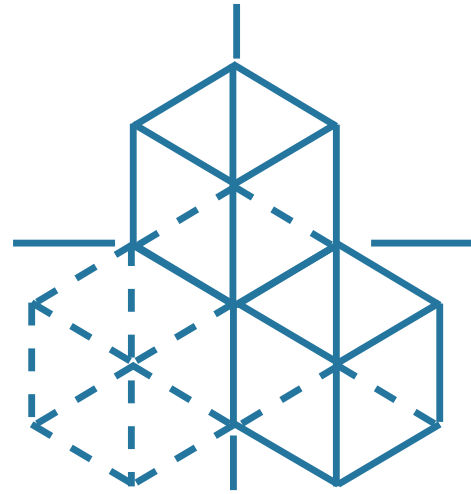

03

Be empathetic without sacrificing excellence.

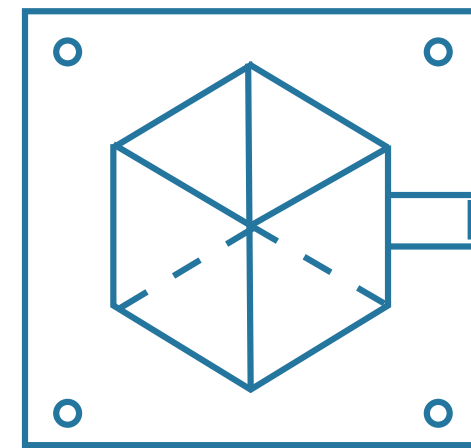

We deliver the best work in the best time possible.

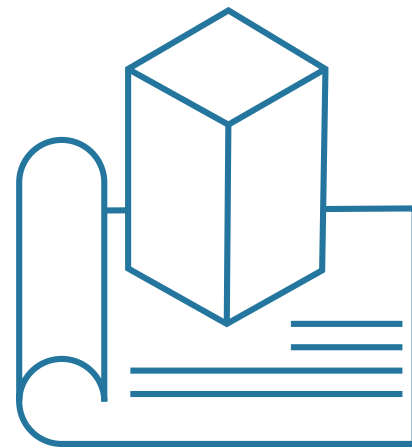

Services

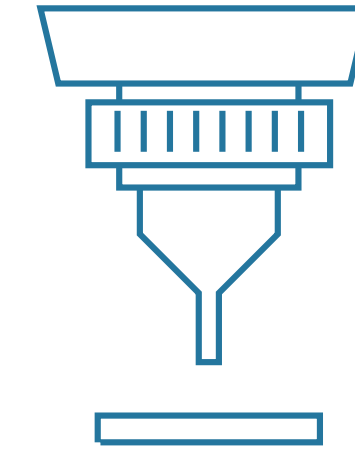

/ Engineering Design

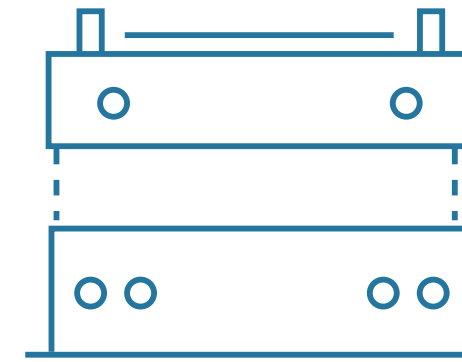

/ Plastic Injection Molding

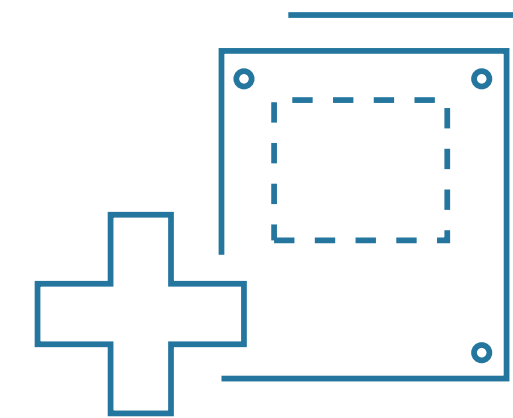

/ Prototyping

/ Machining

/ Mold Manufacturing

/ Mold Repair

We offer services to the United States, Mexico and Latin America from our 4 locations:

Certifications

ISO9001:2015

Manufacture of molded plastic components for medical, automotive, electronics and consumer devices.

ISO13485:2016

Manufacture of molded plastic components for medical devices.

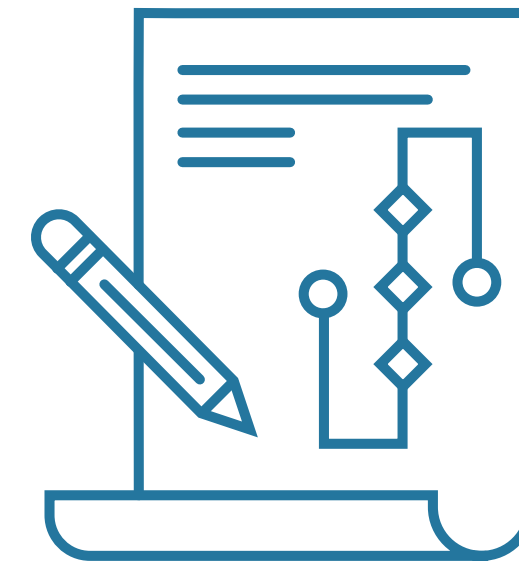

Process Precision Group

Every moment of our process is an opportunity to demonstrate our commitment to quality.

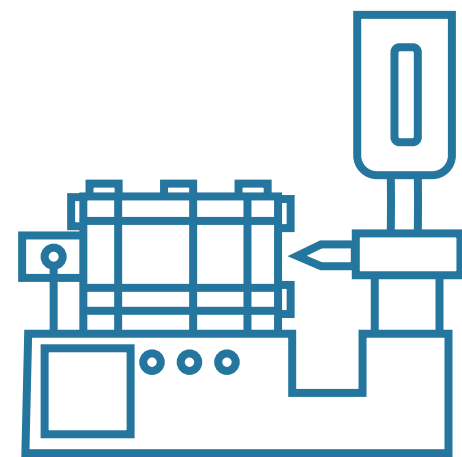

Design

- From idea to concept and development
- Design of products
- 3D design
- Concept style and layout

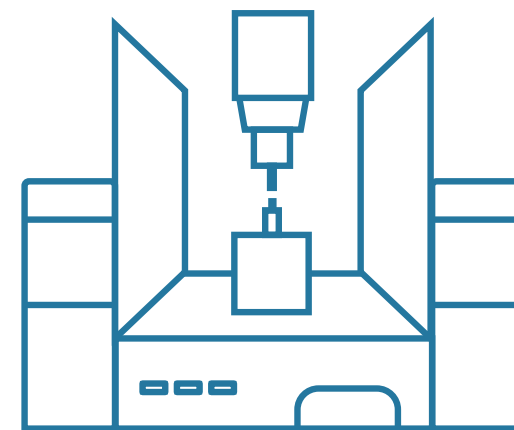

Planning and Programming

- Discovery
- Technology survey
- Proposal

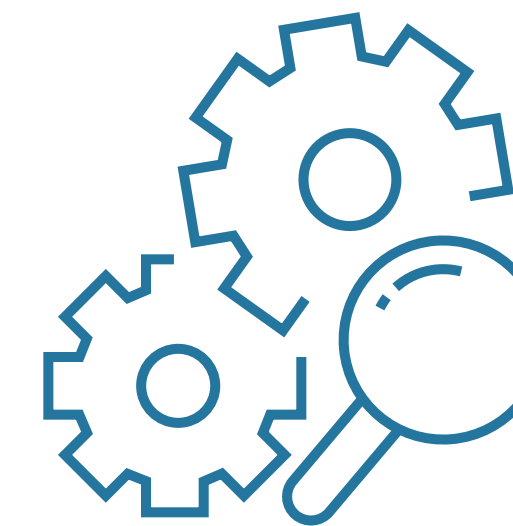

Production or Maintenance

- Prototyping
- Machining
- Mold Manufacturing
- Repair or preventative maintenance

Injection Molding

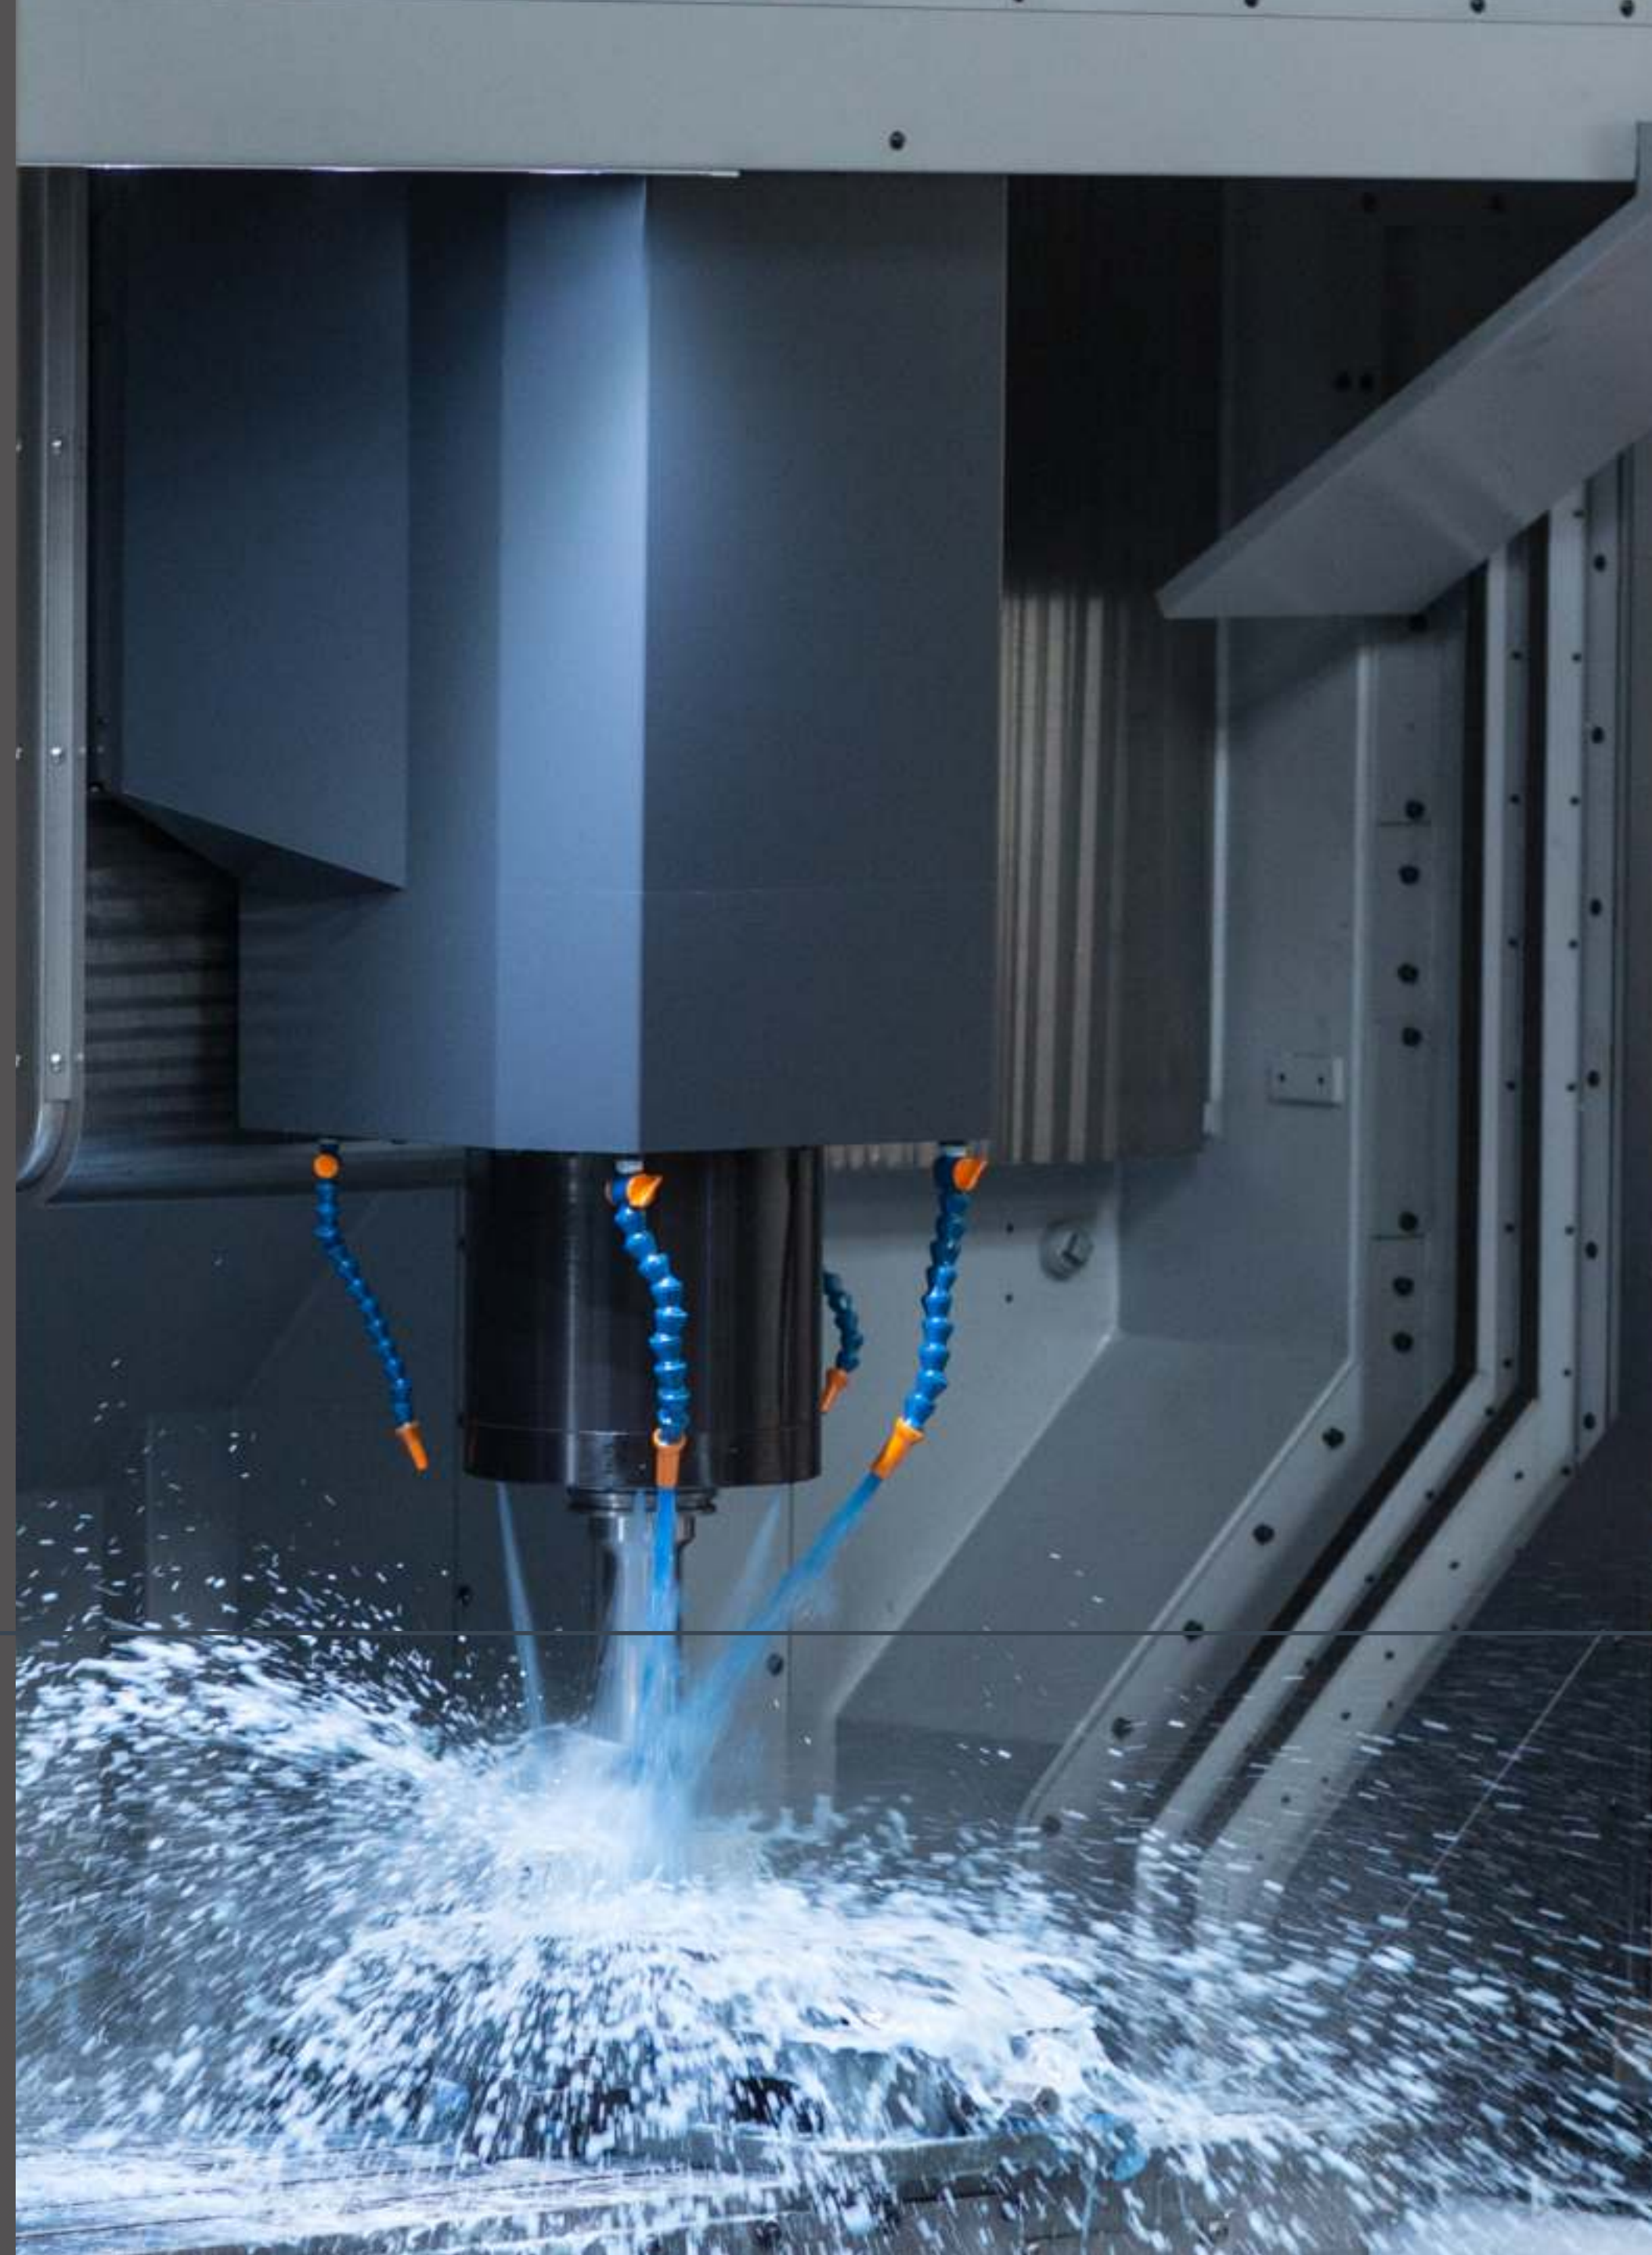

- Production
- Assembly
- Secondary operations

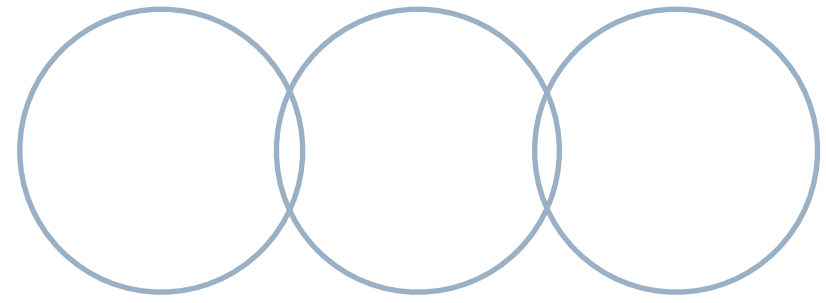

Quality Control

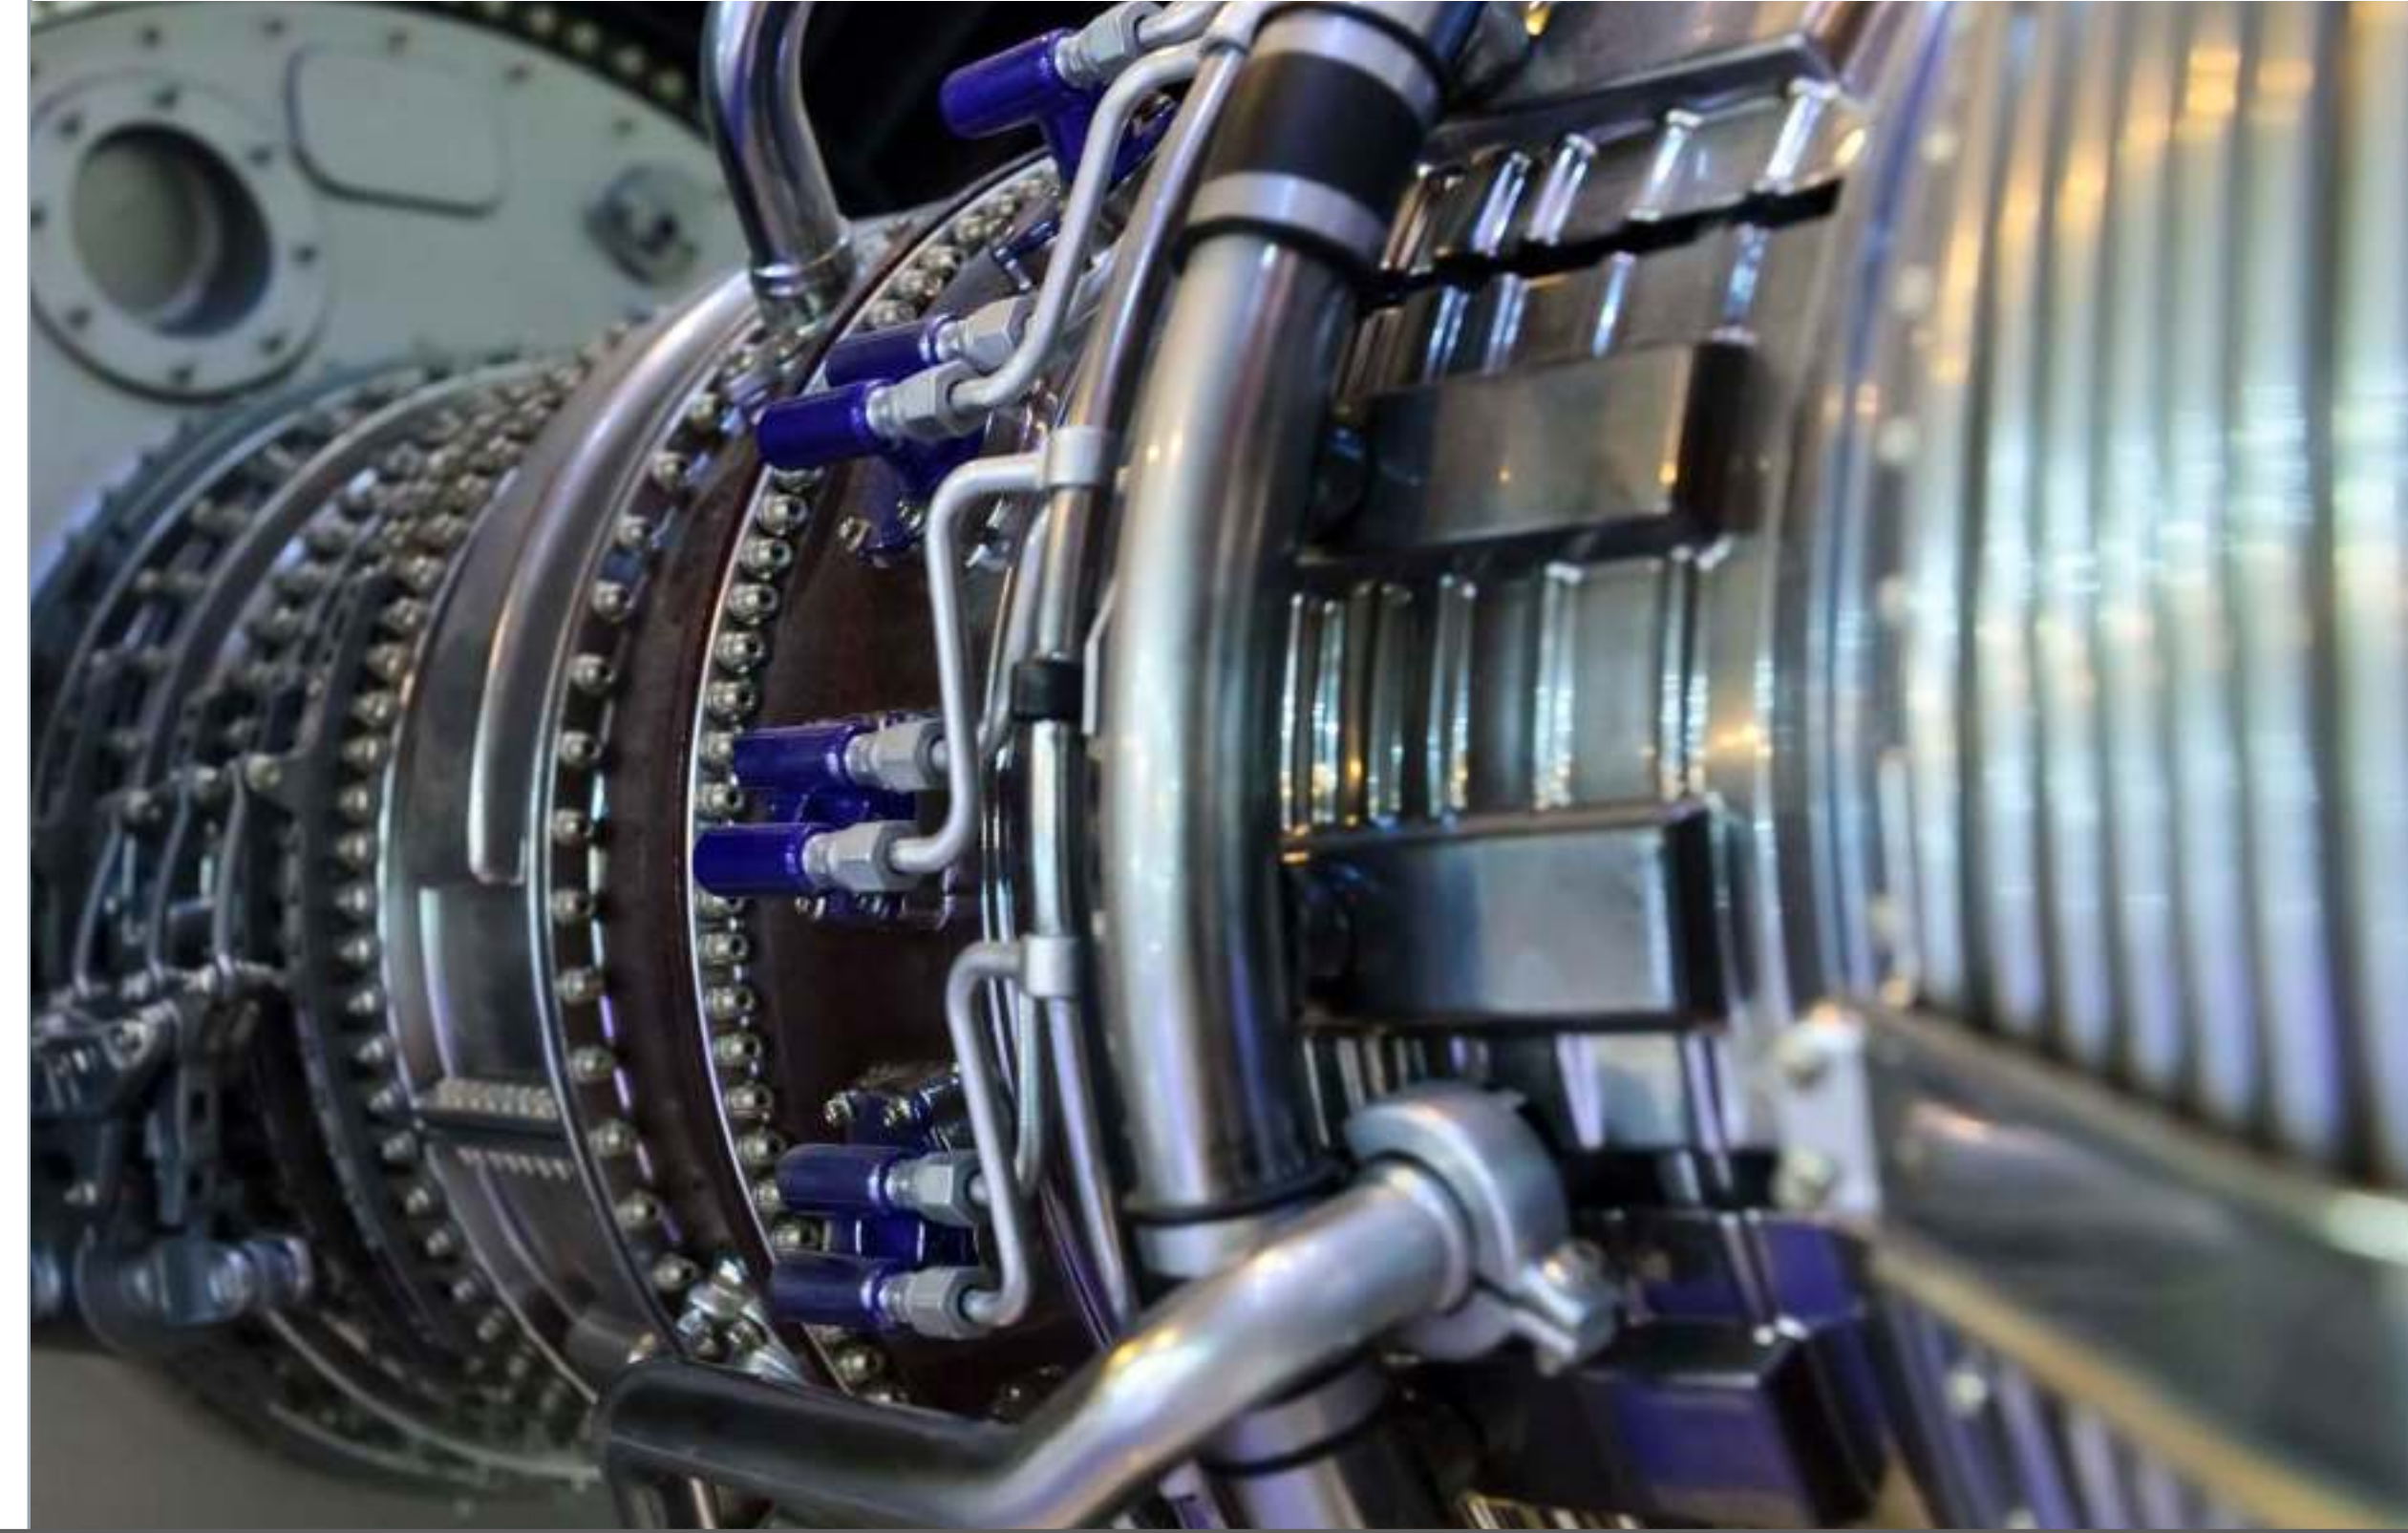

- Dimensional analysis
- Inspection

At Precision Group our mission is simple: we aim to provide a seamless transaction while, at the same time, guaranteeing customer satisfaction.

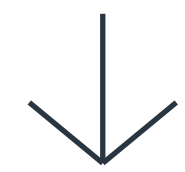

Trusted across many industries.

Energy

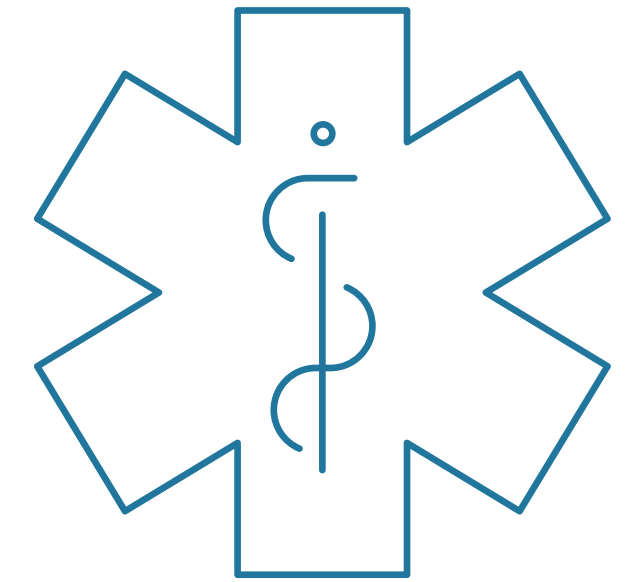

Automotive

01

Medical

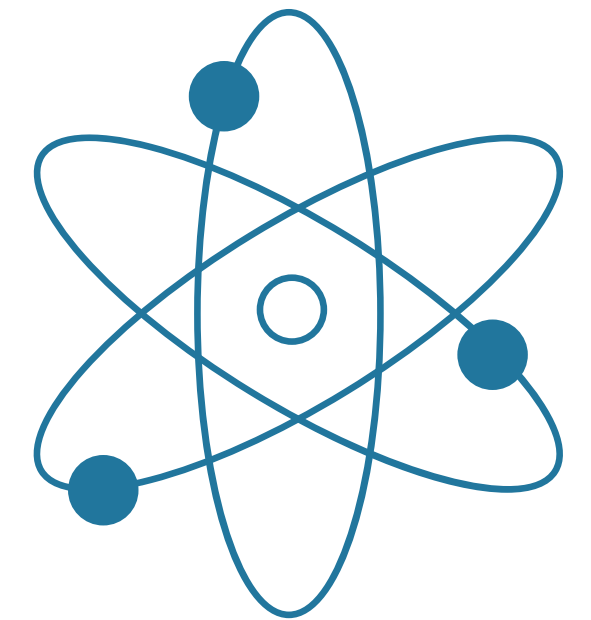

We are leaders in the development of components for the medical sector. We hold ISO9001: 2015 and ISO13485: 2016 certifications, and we have the experience and ability to meet the standards of brands like Alcon Surgical, Omron and Thermo Fisher (with whom we work to produce coronavirus test kits).

02

Science and Technology

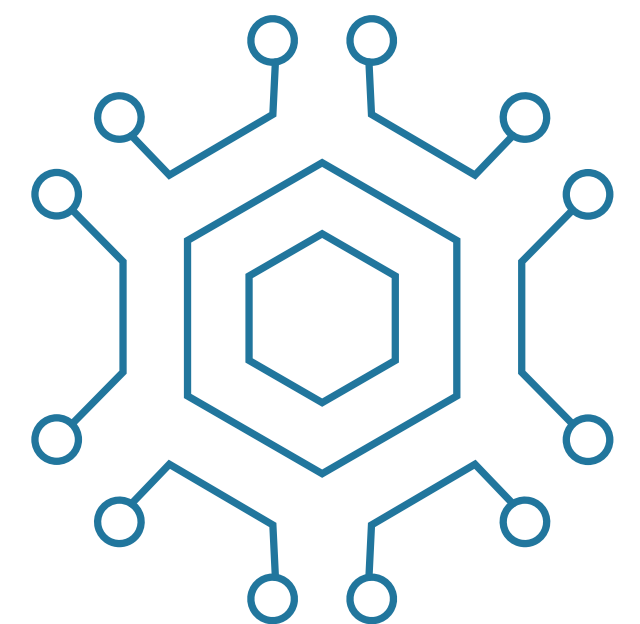

We have collaborated with leading research institutions such as Princeton University and the Southwest Research Institute. Additionally, we have collaborated with NASA on projects such as the Interstellar Frontier Explorer (IBEX) and New Horizons, the first interplanetary space probe to fly over Pluto.

03

Electronics

We have extensive experience in the design, manufacture and maintenance of plastic injection molds to contribute to the development of fiber optic systems for cable, internet and telecommunication applications. We have worked for Corning Cable, Panasonic and Headset Advisor.

04

Consumer

We are ready to take your consumer product from the idea phase to manufacturing and mass production. We have collaborated with a diverse set of companies in the sector such as Black & Decker, Igloo Corporation, Coleman Corporation, General Electric, and many others.

05

Energy

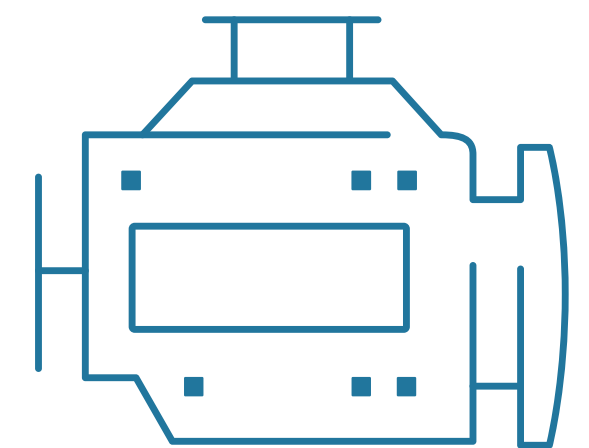

Whether your product is wind turbines, oil pumpjacks, solar panels, or high pressure containers, Precision Group can help energy companies by building and repairing molds, executing complex machining, engineering design and producing injection molded components.

06

Automotive

We have the experience and ability to fabricate molds for automotive exterior and interior assemblies, engine components, fluid control systems, wire harnesses for underhood applications, textured surfaces in need of repair and more. International companies like GM, Toyota, Ford and Chrysler trust us.

Put your project in the hands of the experts.
